Fuel Tax Monthly Report for July 2015

The Iowa Fuel Tax Monthly Report presents the gross gallons of fuel delivered by Iowa licensed Suppliers, Blenders, Importers, Restrictive Suppliers, and Liquefied Petroleum Gas/Compressed Natural Gas Dealers and Users. The report captures information on a monthly basis and is made available on the Motor Fuel monthly reports page of the [Iowa Department of Revenue website](http://www.iowadepartmentofrevenue.com). The Monthly Report is available no later than the last working day of the month following the tax reporting period covered in the Monthly Report. For example, information for the tax period June 1 through June 30, which is reported to the Department of Revenue during the reporting period July 1 to July 31, is contained in the July Monthly Report.

Page 3 of the report shows monthly collections for nine fuel types as well as collections from prior tax periods reported as accounts receivable. Fiscal Year-To-Date and Prior Fiscal Year-To-Date collections, refunds and credits, and collections less refunds and credits are also provided, along with the percent change between the two years. Refund claims can be filed throughout the year, while credits are claimed only once a year on annual income tax returns.

Figure 1 compares monthly net collections across the last 24 months. Net collections were \$57.8 million in June 2015, \$19.8 million higher than in June 2014. The sharp rise in net collections reflects the impact of tax rate increases that became effective on March 1, 2015. With a reported 204.4 million taxable gallons of various fuel types subject to the higher tax rates, the rate increases account for an estimated increase in collections of \$20.4 million during the month.

Page 4 of the report shows gross gallons and taxable gallons by fuel type. Exported gallons account for most of the difference between gross and taxable amounts. Iowa exports well over half of the ethanol blended gasoline produced in the state. Though done infrequently, the number of taxable gallons may be reported in a month other than that for which taxes are due and remitted. The July 2015 report includes estimates of exported gallons for certain taxpayers.

Collections and gallon amounts contained in this report are from the Supplier/Terminal or “Rack” level, not the retail level. Further blending of products may occur throughout the fuel distribution chain. This is the case for most E85 (gasoline blended with 70 to 85 percent ethanol) gallons, so the gallons reported are far below actual retail gallons sold in Iowa.

In 2000, taxable sales of ethanol blended gasoline and gasoline were roughly equal. As Figure 2 shows, over the next six years demand shifted to ethanol blended gasoline sales which rose to over two-thirds of gallons sold, except for August 2006 when a temporary price shift drove a brief change in demand. Since 2007, ethanol blended gasoline has accounted for a monthly average of 73 percent of taxable gallons of motor fuel. However, in July 2015, ethanol blended gasoline accounted for just 62 percent of taxable gallons of motor fuel, its lowest percentage since August 2006 when ethanol blended gasoline represented 38 percent of taxable gallons.

The report also shows a breakdown of the refund dollar amounts by claim type for the month. Refunds are claimed against taxes paid on fuel that is used for non-taxable purposes, such as agricultural or commercial non-highway uses. Refunds are also claimed for excess tax on ethanol blended gasoline and denaturing alcohol. The excess tax on ethanol blended gasoline refund results when a blender purchases gasoline taxed at 31 cents per gallon and collects tax on the resulting ethanol blended gasoline at 29 cents per gallon; therefore, the additional 2 cents paid on the gasoline is eligible for refund. The denaturing alcohol refund applies when the denaturant (gasoline) taxed at 31 cents per gallon is blended with food grade alcohol to produce ethanol. When a refund of Iowa fuel tax is granted for non-taxable usage, those gallons become subject to Iowa sales tax, unless a sales tax exemption applies. Sales tax collected on those gallons is included at the bottom of the second page of the monthly report.
